

PROcussionCare® CymbalCare provides the ultimate in effective, safe conditioning care for all cymbals. Free of harmful polishes, PROcussionCare maximizes cymbal response, sound, and appearance.

LARGE CYMBAL AND STAND

Apply to both sides of bow cymbal surface to remove grime for improved response, tone, and stick definition.

PROcussionCare® . . . Independently Tested. Proven Effective.

Above right are Scanning Electron Microscope images of a cymbal surface before-and-after application of PROcussionCare® CymbalCare. The images clearly show the significant ability of CymbalCare to lift away sound inhibiting grime and corrosion.

HEAR & FEEL THE DIFFERENCE®

Drummers and percussionists have traditionally had limited choices when it comes to cymbal care products. Many cymbal-cleaning solutions and polishes will strip away everything on a cymbal's surface, resulting in a beautiful polished finish, and unfortunately, harsh, brittle sound quality. CymbalCare is designed to lift and remove dust and grime away without damaging the cymbal's patina, surface features that are the result of a cymbal's natural aging process. This patina is vital to the cymbal's naturally attenuated sound quality. CymbalCare will remove excess grime for an attractive natural shine that does not affect the patina. The cymbal's natural tonal spectrum and rich overtones are restored, enhancing sticking definition and response.

PROcussionCare® CymbalCare is a breakthrough micro-barrier conditioning and lubricant formula that transforms the maintenance of cymbals to prevent excess wear and optimize sound quality. With an astounding ability to penetrate and lift away deeply embedded grime and tiny debris particles, PROcussionCare® ensures that your cymbals' vibration and response is unrestricted. A micro-thin barrier conditioning coating remains to resist sticking impact, promote enhanced tone, and protect and extend cymbal life. Subtle overtones are improved, and the cymbal is able to cut through loud mixes with more projection and clarity. The cymbal wash becomes more present in recording, and bell sounds are clean and distinct. Three ideal sizes for use in the shop, on the road, or in studio. Also available with PROcussionCare's Wear Barrier and PedalLube in a three-pack for a total drum maintenance package.

Cymbal Care Made Easy

Formulated especially for the high-impact demands of drums and percussion, PROcussionCare® CymbalCare is the result of research into micro-lubricants for demanding ballistics applications. With an astounding ability to penetrate and lift away deeply embedded grime and tiny debris particles, PROcussionCare® ensures that your drumheads vibration and response is unrestricted. A micro-thin barrier lubricant coating remains after treatment to resist sticking impact, promote enhanced tone, and protect and extend the life of heads and sticks. Recommended application is with a soft lint-free cloth. Product quickly dries to the touch for immediate use.

PROcussionCare®—Uniquely Effective, Environmentally responsible

PROcussionCare's non-toxic formula is made expressly for use on all cymbals, and is silicone and teflon free. The proprietary formulation is the culmination of years of research and development in flex-film technologies, and has been a cornerstone of private label products since 1986.
